TEST CASE DOCUMENT TABLES

Find the Thimble:

Sunny Day Paths

BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	1	Find the Thimble, the player picks an odd number between 1-9 for the number of games to play **Input: 5**	Indicates to user "You want to play best of 5 games"			
	2	Find the Thimble, The player wins if they correctly guess which hand contains the thimble. **Input: R**	Indicates user wins with "You Won!"			
	3	Find the Thimble, The player wins if they correctly guess which hand contains the thimble. **Input: L**	Indicates user wins with "You Won!"			

AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	1	Find the Thimble, the player picks an odd number between 1-9 for	Indicates to user "You want to play best of 5 games"	"You want to play best of 5 games"	X	

		the number of games to play **Input: 5**				
X	2	Find the Thimble, The player wins if they correctly guess which hand contains the thimble. **Input: R**	Indicates user won with "You Won!"	"You lost!"		X
X	3	Find the Thimble, The player wins if they correctly guess which hand contains the thimble. **Input: L**	Indicates user won with "You Won!"	"You Won!"	X	

Rainy Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	1	Find the Thimble, user selects incorrect menu choice for game (odd number 1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an odd integer between 1-9: "			
	2	Find the Thimble, The player picks between "L" or "R"	Error message "Invalid choice. Please enter "L" or "R": "			

		Input: Right				

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	1	Find the Thimble, user selects incorrect menu choice for game (odd number 1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-9: "	"Invalid menu choice. Please enter an integer between 1-9: "	X	
X	2	Find the Thimble, The player picks between "L" or "R" **Input: Right**	Error message "Invalid choice. Please enter "L" or "R":"	"Invalid choice. Please enter "L" or "R":"	X	

Coin Flip:

Sunny Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	3	Coin, the player picks an odd number between 1-9 for the number of games to play **Input: 7**	Indicates to user "You want to play best of 7 games"			

	4	Coin Flip, user wins if correctly guesses heads or tails correctly. **Input: T**	Indicates user wins with “You Won!”			
	5	Coin Flip, user wins if correctly guesses heads or tails correctly. **Input: H**	Indicates user wins with “You Won!”			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	3	Coin, the player picks an odd number between 1-9 for the number of games to play **Input: 7**	Indicates to user “You want to play best of 7 games”	“You want to play best of 7 games”	X	
X	4	Coin Flip, user wins if correctly guesses heads or tails correctly. **Input: T**	Indicates user won with “You Won!”	“You lost!”		X
X	5	Coin Flip, user wins if correctly guesses heads or tails correctly. **Input: H**	Indicates user won with “You Won!”	“You Won!”	X	

Rainy Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	2	Find the Thimble, user selects incorrect menu choice for game (odd number 1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-9: "			
	3	Coin Flip, user picks between "H" or "T" **Input: "Heads"**	Error message "Invalid choice. Enter either "H" or "T": "			
	4	Coin Flip, user picks between "H" or "T" **Input: "I pick heads"**	Error message "Invalid choice. Enter either "H" or "T": "			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	2	Find the Thimble, user selects incorrect menu choice for game (odd number 1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-9: "	"Invalid menu choice. Please enter an integer between 1-9: "	X	

X	3	Coin Flip, user picks between “H” or “T” **Input: “Heads”**	Error message “Invalid choice. Enter either “H” or “T”: ”	Error message “Invalid choice. Enter either “H” or “T”: ”	X	
X	4	Coin Flip, user picks between “H” or “T” **Input: “I pick heads”**	Error message “Invalid choice. Enter either “H” or “T”: ”	Error message “Invalid choice. Enter either “H” or “T”: ”	X	

Guess the Number:

Sunny Day Paths

BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	5	Guess the Number, The player wins if they correctly guess the number between 1-9. **Input: 2**	Indicates user wins with “You Won!”			
	6	Guess the Number, The player wins if they correctly guess the number between 1-9. **Input: 5**	Indicates user wins with “You Won!”			

AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	5	Guess the Number, The player wins if they correctly guess the number between 1-9. **Input: 2**	Indicates user won with "You Won!"	"You lost!"		X
X	6	Guess the Number, The player wins if they correctly guess the number between 1-9. **Input: 5**	Indicates user won with "You Won!"	"You Won!"	X	

Rainy Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	1	Guess the number, user selects incorrect menu choice for game (1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-9: "			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	1	Guess the number, user selects incorrect menu choice for game (1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-9: "	"Invalid menu choice. Please enter an integer between 1-9: "	X	

Even Odd:

Sunny Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	7	Find the Thimble, the player picks an odd number between 1-9 for the number of games to play **Input: 5**	Indicates to user "You want to play best of 5 games"			
	8	Even Odd The player picks an odd number between 1-9 for the number of games to play **Input: 5**	Indicates to user "You want to play best of 5 games"			

	9	<u>Even Odd</u> User wins if they guess odd, when an integer which, based on the computer's pick, will result odd **Input: O**	Indicates user wins with "You Won!"			
	10	<u>Even Odd</u> User wins if they guess even, when an integer which, based on the computer's pick, will result in even total **Input: E**	Indicates user wins with "You Won!"			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
x	7	<u>Find the Thimble,</u> the player picks an odd number between 1-9 for the number of games to play **Input: 5**	Indicates to user "You want to play best of 5 games"	"You want to play best of 5 games"		
x	8	<u>Even Odd</u> The player picks an odd number between 1-9 for	Indicates to user "You want to play best of 5 games"	"You want to play best of 5 games"	X	

		the number of games to play **Input: 5**				
X	9	Even Odd User wins if they guess odd, when an integer which, based on the computer's pick, will result odd **Input: O**	Indicates user won with "You Won!"	"You lost!"		X
X	10	Even Odd User wins if they guess even, when an integer which, based on the computer's pick, will result in even total **Input: E**	Indicates user won with "You Won!"	"You Won!"	X	

Rainy Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	7	Find the Thimble, user selects incorrect menu choice for game (odd number 1-9) **Input: 0**	Error message "Invalid menu choice. Please enter an odd integer between 1-9: "			

	8	<u>Even Odd</u> The player picks a number out of range not between 1-9 for the number of games to play **Input: 0**	Error message: “Please pick an odd number from 1-9”			
	9	<u>Even Odd</u> User inputs invalid value that does not indicate whether the user’s guess was even or odd **Input: W**	Error message: “Invalid input, please indicate O for odd or E for even”			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	7	<u>Even Odd</u> The player picks a number out of range not between 1-9 for the number of games to play **Input: 0**	Error message “Invalid menu choice. Please enter an integer between 1-9: ”	“Invalid menu choice. Please enter an odd number from 1-9”	X	
X	8	<u>Even Odd</u> User inputs invalid value that does not indicate whether the user’s guess was even or odd **Input: W**	Error message: “Invalid input, please indicate O for odd or E for even”	“Invalid input, please indicate O for odd or E for even”	X	

Find the Red Thread:

Sunny Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	9	Find The Red Thread, user wins if they take the red thread out of the amount they pull **Input: Number between 1-10 (user doesn't pick red thread)**	Indicates user wins with "You Won!"			
	10	Find The Red Thread, user wins if they take the red thread out of the amount they pull **Input: Number between 1-10**	Indicates user wins with "You Won!"			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	9	Find The Red Thread, user wins if they take the red thread out of the amount they pull. They have to input a number between 1-10 which will be the number of	Indicates user won with "You Won!"	"You lost!"		X

		threads they will take out of the box each turn. **Input: Number between 1-10 (user doesn't pick red thread)**				
X	10	Find The Red Thread, user wins if they take the red thread out of the amount they pull. They have to input a number between 1-10 which will be the number of threads they will take out of the box each turn. **Input: 2**	Indicates user won with "You Won!"	"You Won!"	X	

Rainy Day Paths

EXAMPLE BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT

	1	Find the red Thread, user wins if they take the red thread out of the amount they pull. They have to input a number between 1-10 which will be the number of threads they will take out of the box each turn. **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-10"			

EXAMPLE AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	1	Find the red Thread, user wins if they take the red thread out of the amount they pull. They have to input a number between 1-10 which will be the number of threads they will take out of the box each turn. **Input: 0**	Error message "Invalid menu choice. Please enter an integer between 1-10"	"Invalid menu choice. Please enter an integer between 1-10"	X	

Main Menu:

Sunny Day Paths

BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	1	Main, user selects a number between 1 and 6 **Input: 3**	User enters the game **Guess the Number**			

AFTER TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
X	1	Main, user selects a number in range 1-6 **Input: 3**	User enters the game **Guess the Number**	User enters the game **Guess the Number**	X	

Rainy Day Paths

BEFORE TESTING

RUN	NUM	TEST	EXPECTED RESULT	ACTUAL RESULT	CORRECT	INCORRECT
	1	Main, user selects a number outside range 1-6 **Input: 8**	User is prompted to re-enter an input, will loop if needed until a valid input is given			

AFTER TESTING
